

Solid Fusion™

*Why choose **Solid Fusion**™?*

Because it will bring Wireless Mobile Sales and Order Entry to proven business systems.

Solid Fusion™ connectivity software will synchronize Solid Mobile Sales, inventory, and accounting activities with your existing accounting or ERP systems.

We respect the investments that you have made in your back office systems. To show our support, we have developed connectivity software to manage the flow of customer, inventory, order entry, and sales transactions between your existing systems and Solid Mobile Sales. Solid Mobile Sales is easily implemented in a matter of days. As well, Solid Innovation staff will work with you to get you up and running.

Solid Fusion is communications software that manages the flow of transactions between your Solid Innovation mobile solution and your existing back office system. While Solid Mobile Central manages communications with your mobiles, and you manage the back office, Solid Fusion provides the link with your accounting system.

Solid Innovation, Inc.

CANADA
